THIAGO YABUKI DE ARAUJO

FULL STACK DEVELOPER

I have worked as a repair technician for electronic equipment, improving my communication skills with clients and staff. I recently transitioned my career to full-stack software development and have been freelancing for the past two years. My specialties include C#, Angular, HTML, CSS.

EXPERIENCE

Freelancer, Portugal
Full Stack Developer
September 2022 - Present

Project: Hestia Technologia
- This project consists of a consultancy management company; its backend was written in the "TypeScript" programming language. It has various features related to managing contracts, projects and employees, such as viewing data on the projects carried out by the company, the possibility of removing, changing and inserting projects, among others.
- Tecnologies: Angular, HTML, CSS, TypeScript, SQL

Project: Tourist Accommodation Management
- This program was written in the C# programming language and is designed to manage tourist accommodation. It includes various functions related to the management of room rentals, such as the visualization of data on rentals made by clients, a list of available rooms, the possibility of removing, changing and inserting rooms by saving them in files, among others. The program also allows you to create and store accounts for use with the software.
- Tecnologies: C#, .NET Core
